

BALCRETE

COMPANY PROFILE

Balcrete specialises in the design and manufacture of high quality, sustainable precast and polished concrete products. With over 20 years of international experience, our team combines structural expertise with artisan craftsmanship to deliver bespoke concrete solutions. Balcrete combines concrete finishes and colour amalgamations to create uniquely designed pieces that will last a lifetime. Alongside our custom commissions, we also produce a range of standardised products including our H-post wall system, retaining blocks, ranch-style fencing, planters, and more.

DECORATIVE H POST WALLS

Manufactured in County Donegal, our precast concrete is a strong, durable, architecturally appealing and cost-effective alternative to traditionally built walls. Perfect for recreational parks and residential estates.

DECORATIVE H POST WALLS

Our high quality wall panels are available in two colours: Light Grey and Raven Grey. Choose from single-sided or double-sided stone-effect finishes to suit your project.

Panel heights above ground are available in:

1.2m, 1.6m, 2.0m, and 2.4m, with an additional 400mm to 800mm designed to be anchored below ground, depending on the height selected.

All panels and H-posts are steel reinforced for maximum strength and durability.

RANCH STYLE FENCING

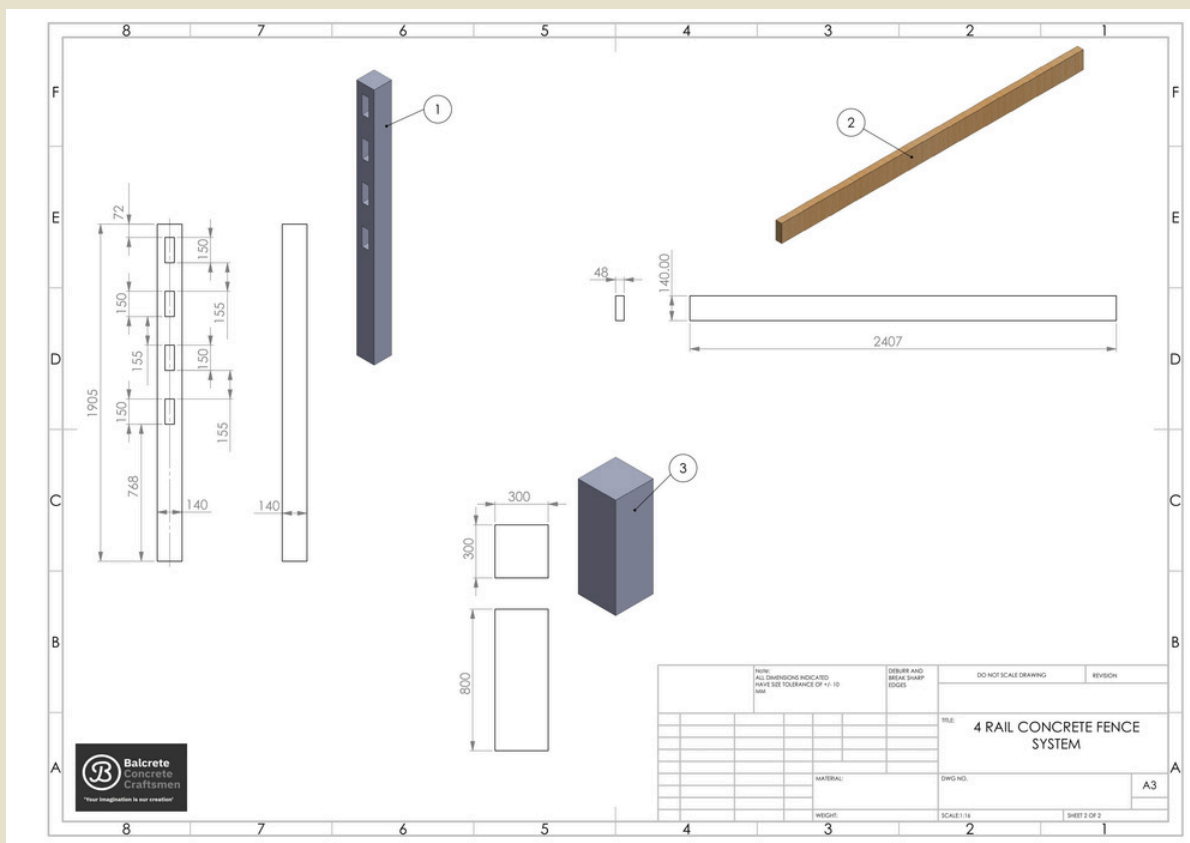

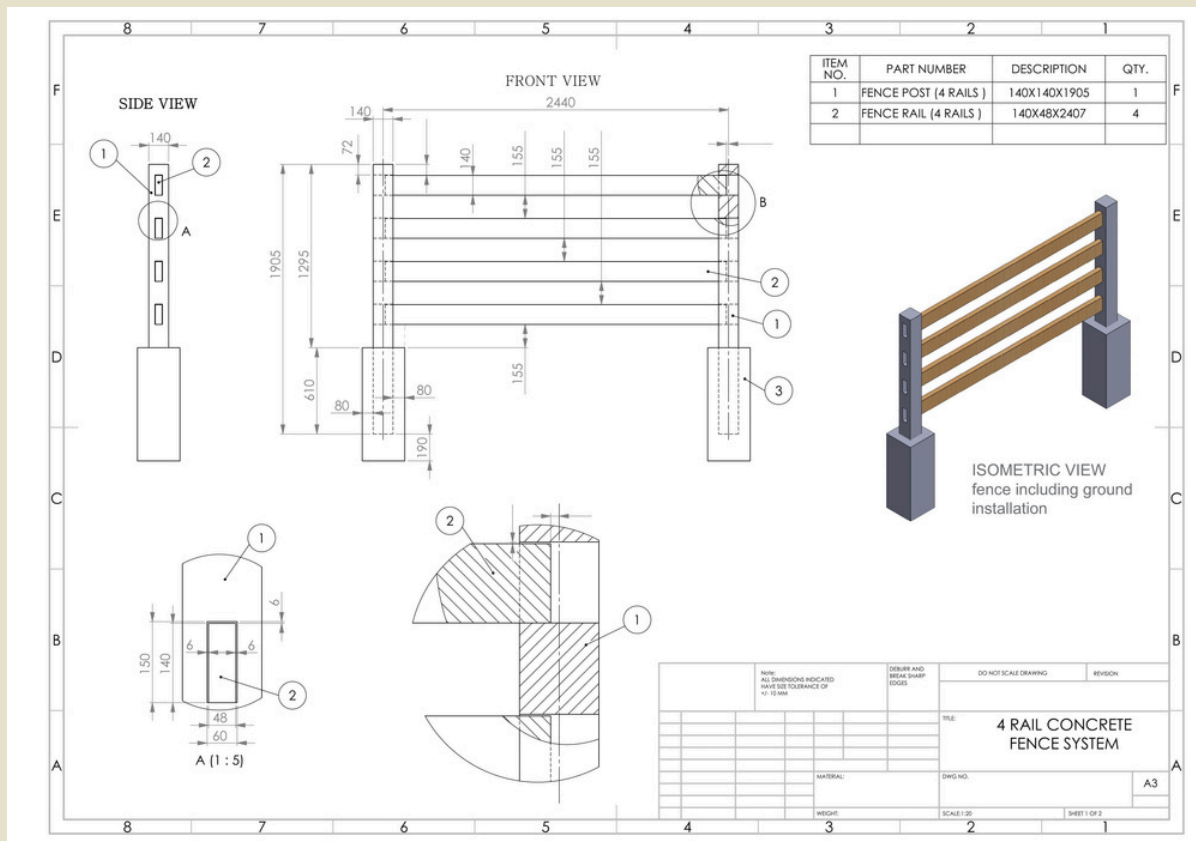

Our ranch-style fencing is available in two attractive colours: Brown and Raven Grey. Choose from either a 3-rail or 4-rail design—offering a stylish solution for everyone.

All rails and H-posts are reinforced with steel to ensure long lasting strength and durability.

This system is the perfect low-maintenance, aesthetic alternative to traditional timber fencing, delivering the look you want with none of the upkeep.

STONE EFFECT RETAINING BLOCKS

Our robust stone-effect retaining blocks measure 1.8m (L) x 600mm (H) x 600mm (W) and weigh approximately 1.5 tonnes each. We also offer half blocks for added flexibility during installation.

To complete and enhance the overall appearance of your wall, we manufacture matching wall caps designed to complement the stone effect finish.

Both the retaining blocks and wall caps feature inbuilt lifting points, ensuring safe and efficient handling on-site.

We can apply the stone-effect finish to multiple sides of the blocks when required, making them ideal for projects where several faces are visible.

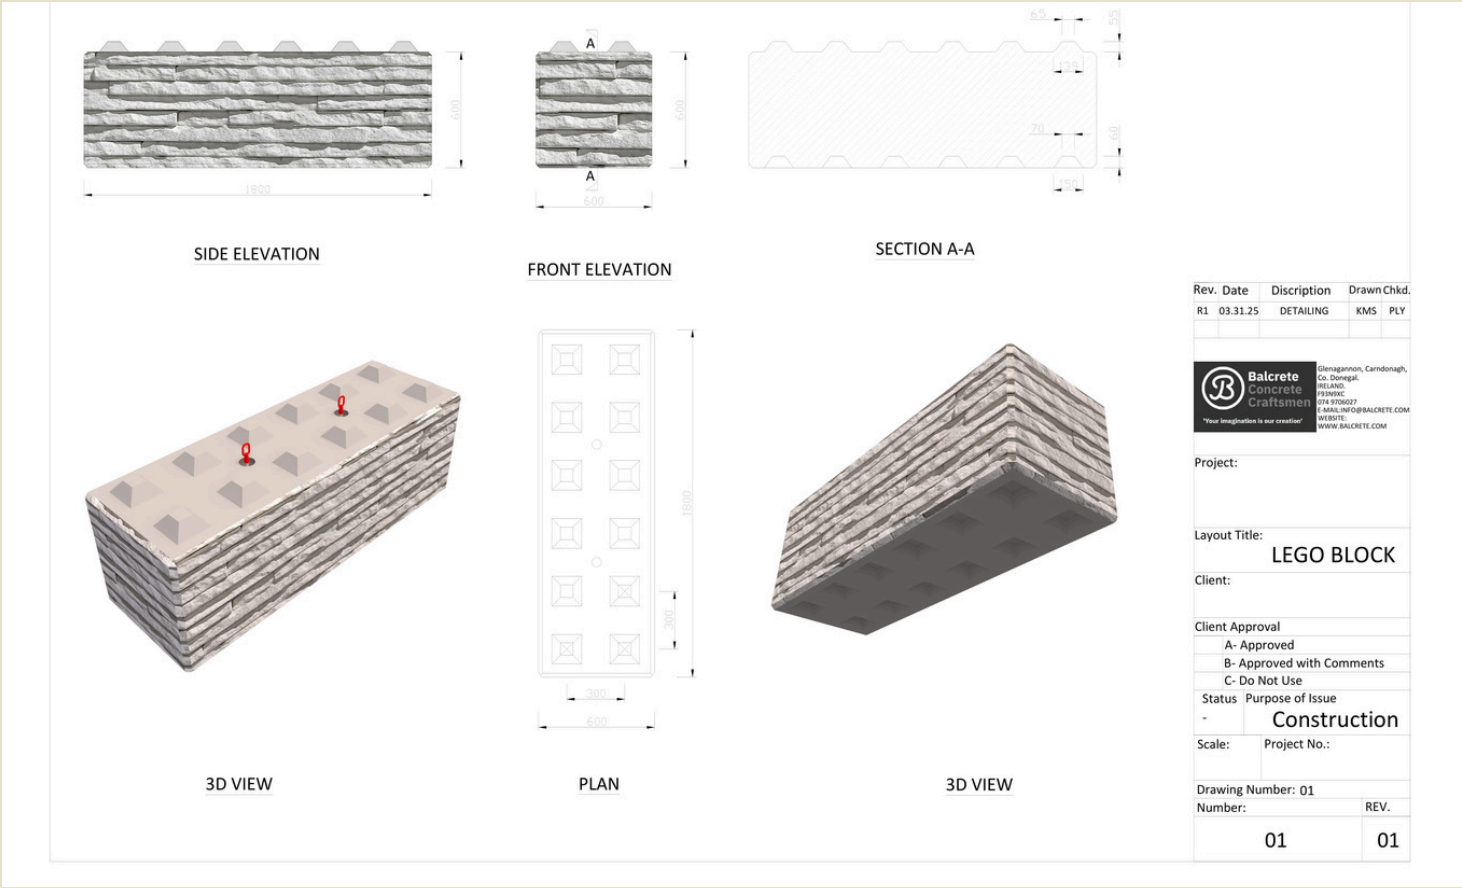

STONE EFFECT RETAINING BLOCKS

These blocks are a more aesthetic and cost effective alternative to traditional shuttered walls, offering the look of natural stone without the need for time-consuming formwork or on-site finishing.

Working in the same way as standard Lego-style blocks, they interlock for quick, secure placement, making them ideal for a wide range of retaining and landscaping applications.

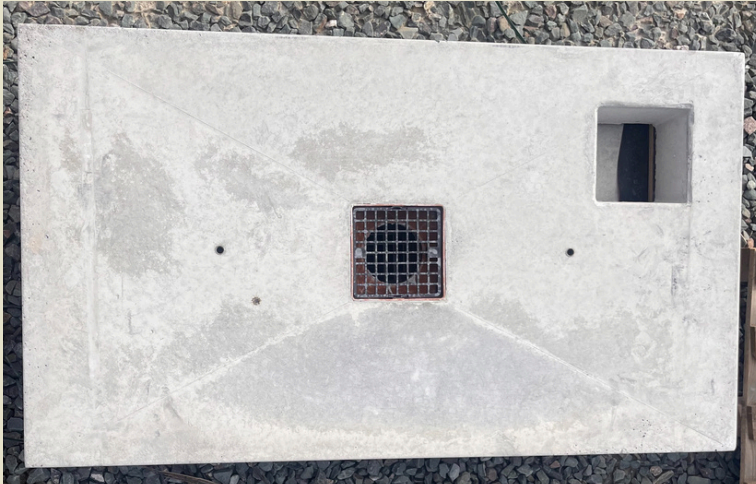

STONE EFFECT RETAINING BLOCKS

HEAT PUMP BASES

1000mm x 600mm

1200mm x 700mm

Our precast heat pump bases are available in two sizes:

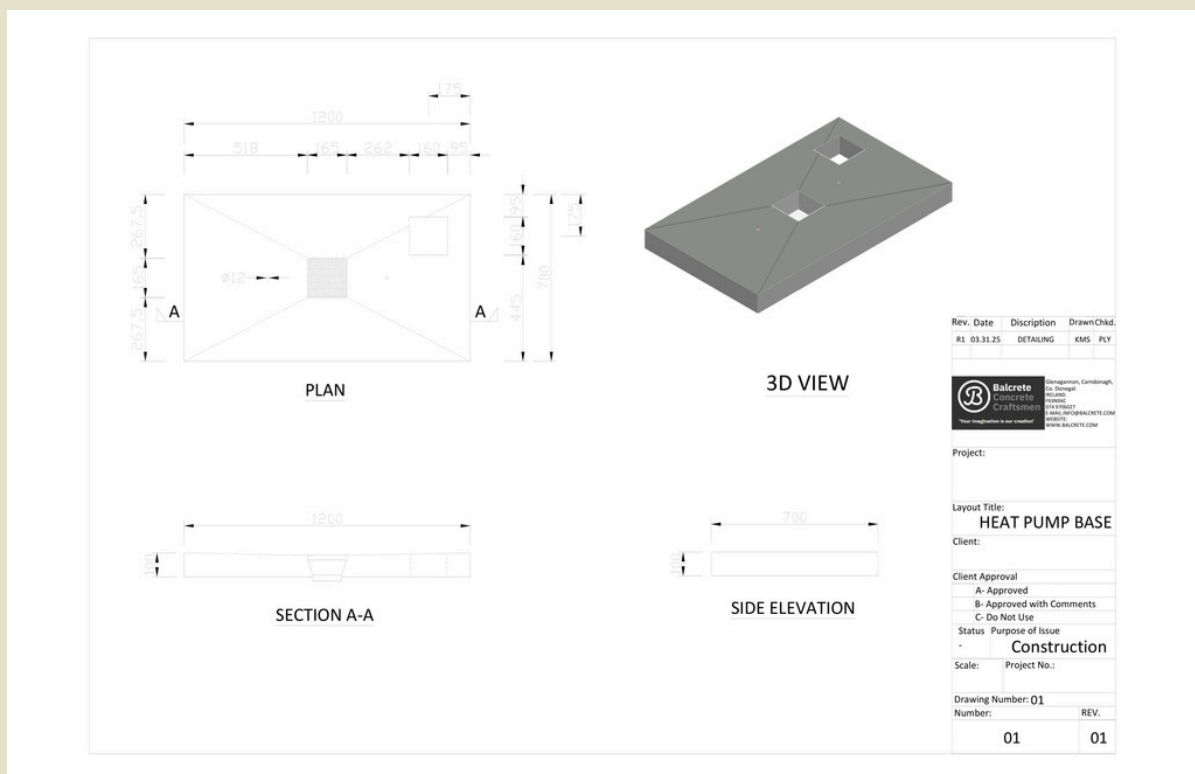

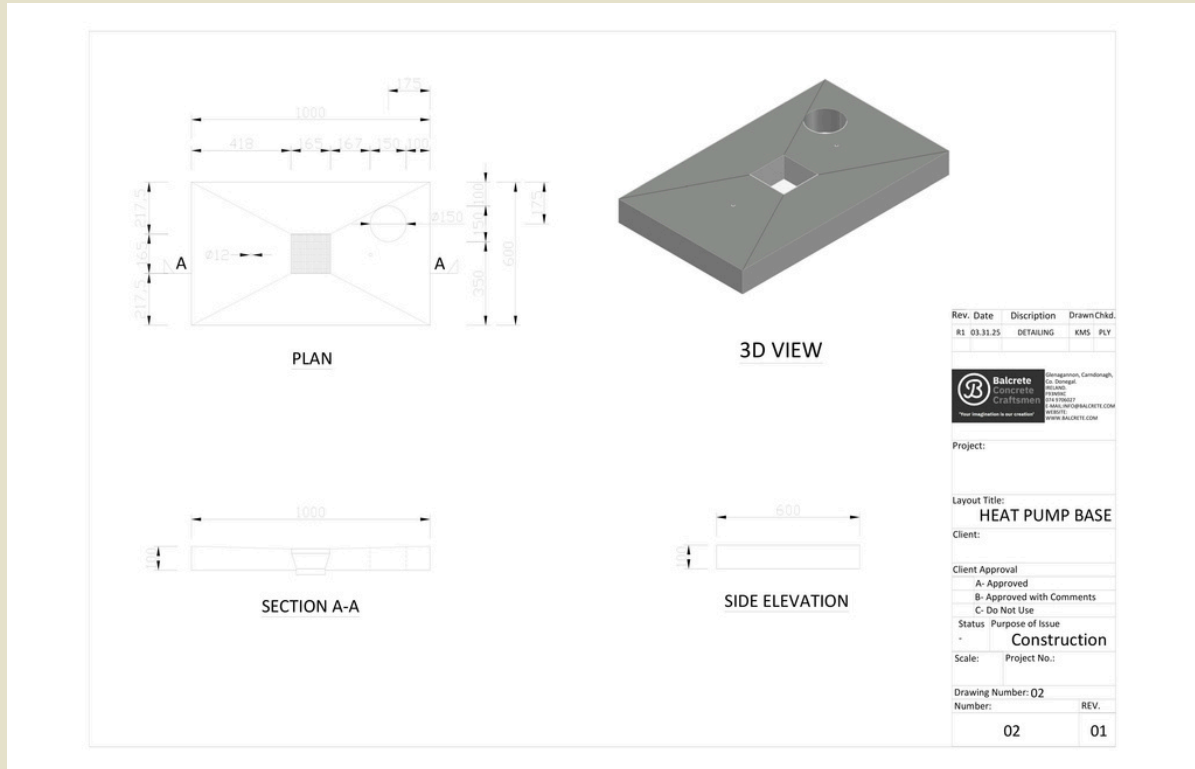

1000mm x 600mm and 1200mm x 700mm.

Each base is designed with integrated lifting points for safe and easy handling on site.

These bases offer a practical, time saving solution, allowing for quick installation with minimal labour. Simply place in position and they're ready for immediate installation of your heat pump unit —no curing time, no delays.

MAN HOLE SURROUNDS

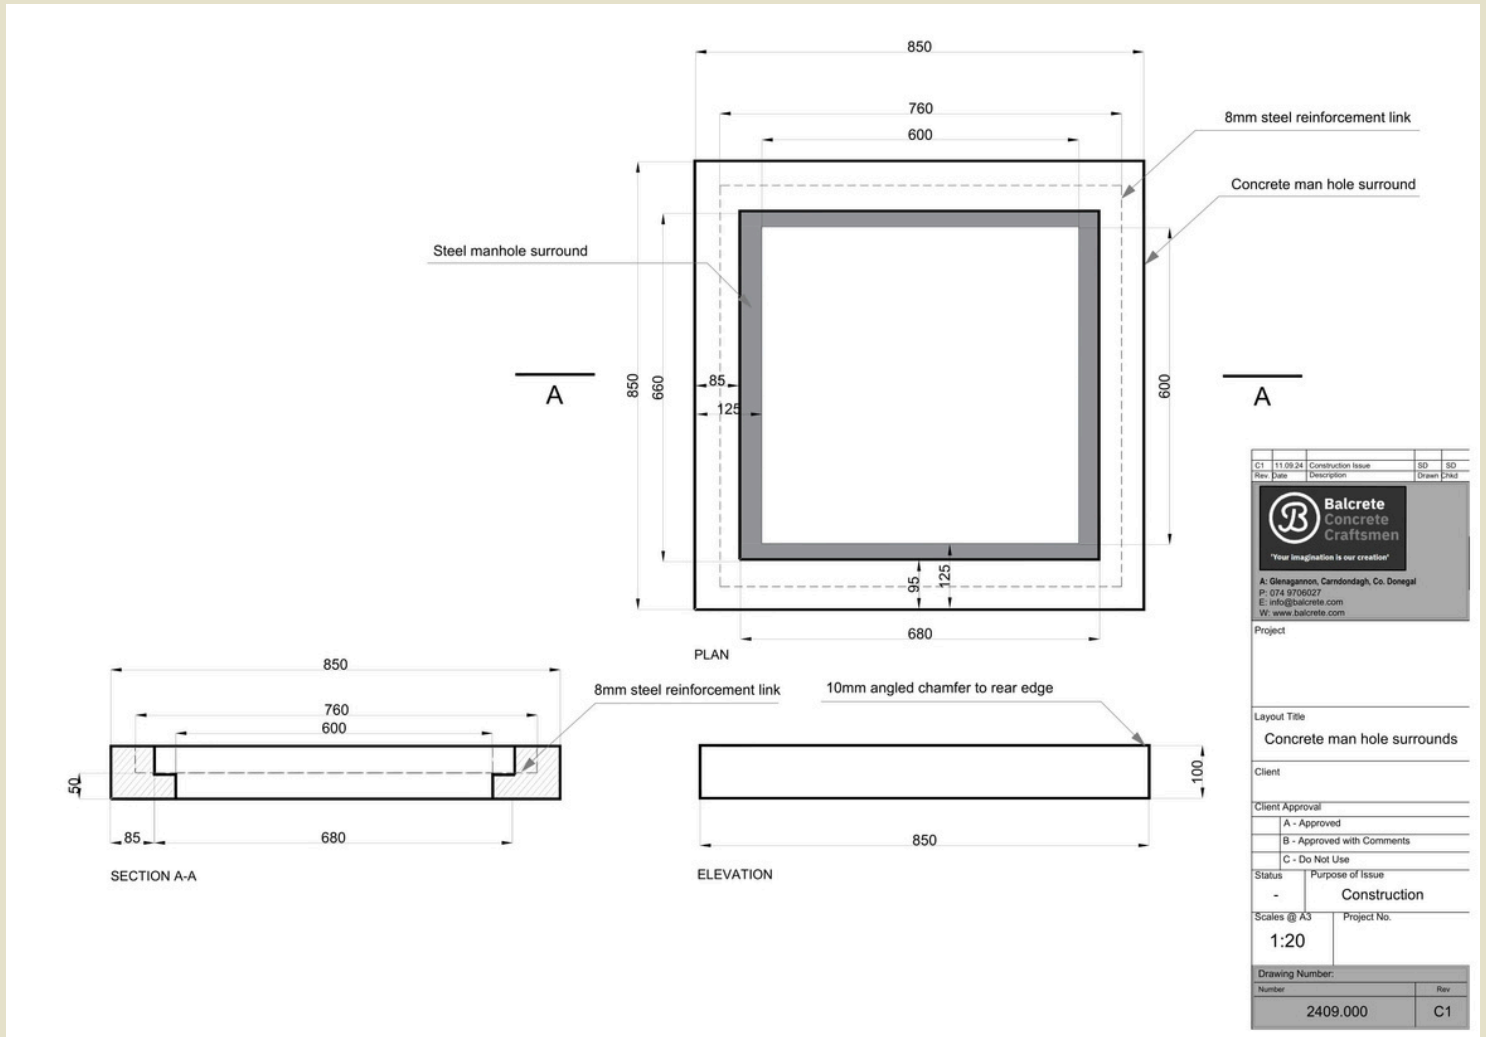

Our precast manhole surrounds measure 850mm (L) x 850mm (W) and are steel-reinforced for strength and durability. Each unit comes with a robust steel manhole cover and is finished in an attractive charcoal colour.

Designed for ease of installation, these surrounds can be quickly positioned and then paved, concreted, or tarmacked around—making them an ideal solution for final groundworks.

A clean, low-maintenance, and aesthetic option that complements both residential and commercial finishes.

BESPOKE COMMISSIONS

At Balcrete, we specialise in creating unique, made to order concrete pieces for both residential and commercial projects. With over 20 years of international experience, our team has developed a reputation for craftsmanship, attention to detail, and creative problem-solving. Whether you're looking for a single feature piece or an entire suite of custom furniture, we're here to help bring your ideas to life.

No job is too big or too small — from one off designs to large scale architectural elements. If you can think it, we can make it. Our workshop has the tools, expertise, and flexibility to take on highly customised work with precision and care. We've had the privilege of collaborating on a range of bespoke projects in the past few years.

Every project is approached with a focus on partnership and communication. We work closely with clients, contractors, and designers to ensure timelines are met, specifications are followed, and the final result exceeds expectations. From initial concept through to delivery and installation, we aim to make the process smooth, collaborative, and efficient.

If you're interested in discussing a custom commission, we'd love to hear from you.

Balcrete was commissioned to design and produce custom polished concrete steps and matching cladding for a residential property. The result is a refined and cohesive architectural feature that blends durability with a sleek, modern finish, enhancing the property's overall aesthetic

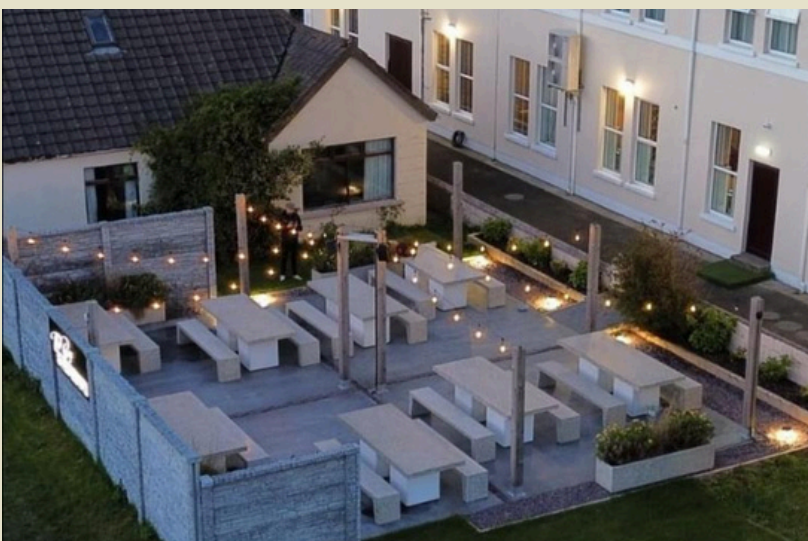

BESPOKE COMMISSIONS

Commissioned by a public play park in Co. Donegal, Balcrete designed and manufactured a robust polished concrete table tennis table, complete with durable steel netting. Built for heavy outdoor use, the table combines playability with modern design, ensuring long-lasting performance in a communal setting.

Balcrete was commissioned to design and manufacture bespoke external log storage for a residential property in Co. Dublin. Crafted in durable precast concrete, the unit combines functionality with a clean, modern aesthetic, perfectly complementing the property's exterior design.

Balcrete was commissioned to create a stylish and durable outdoor seating area for a hotel in Co. Donegal. The project included the pouring of a polished concrete slab, and the manufacture, grinding, and polishing of custom tables, benches, and planters. For added privacy and aesthetic appeal, our double-sided precast wall panels were also incorporated into the design.

BESPOKE COMMISSIONS

Balcrete delivered a complete outdoor concrete solution for this private residential project. The scope included pouring and polishing a seamless concrete surface, along with the manufacture, grinding, and polishing of bespoke 'L'-shaped benches, integrated BBQ units, and a separate floating seating area. The result is a sleek, functional, and visually striking outdoor living space.

Balcrete was commissioned to design and manufacture custom outdoor steps for a private residential client seeking a modern, minimalist aesthetic. The result is a sleek and contemporary concrete feature that enhances the entrance with clean lines and durable craftsmanship.

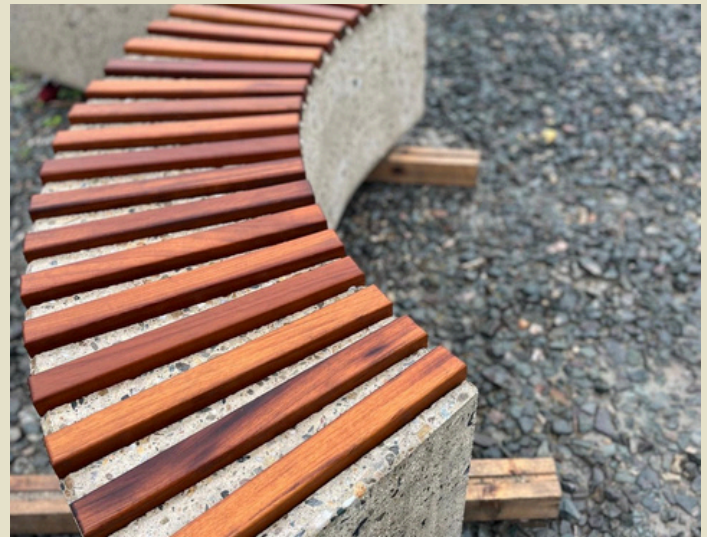

Balcrete was commissioned by Glenveagh Homes to produce bespoke white wall caps and architectural door surrounds for multiple residential developments across Ireland. These custom precast elements were designed to complement the clean, contemporary aesthetic of Glenveagh's homes while delivering long-lasting quality and visual appeal.

BESPOKE COMMISSIONS

Commissioned by Walls Construction, Balcrete was tasked with the manufacture and finishing of a comprehensive suite of concrete elements for the Shanganagh Castle development in Co. Dublin. This included over 230 metres of linear benches, a range of custom radius benches, benches with integrated armrests, dry riser covers in fair faced concrete, as well as polished concrete bollards and steps — all crafted to meet the project's high design and durability standards.

BESPOKE COMMISSIONS

Commissioned by Suir Island Ltd, Balcrete was engaged to manufacture, grind, polish, and seal bespoke picnic tables, benches, and paving slabs for a public space regeneration project on Suir Island, Co. Tipperary. The concrete benches feature elegant recesses fitted with sustainably sourced Iroko timber slats, combining durability with refined contemporary design

BESPOKE COMMISSIONS

Balcrete was commissioned by an Irish construction company to manufacture high-strength ballast blocks and precision-cast counterweights for crane operations. Engineered for stability and safety, these concrete components were produced to exacting specifications to support heavy lifting requirements on-site.

Balcrete manufactured a stunning outdoor area for a local hotel, featuring polished concrete tables, chairs, and floating benches. This sleek and durable design enhances the guest experience, perfectly complementing the hotel's beautiful surroundings and breathtaking views.

POLISHED CONCRETE FLOORING

Polished concrete flooring offers a sleek, modern finish that is durable and low-maintenance. Ideal for residential, commercial, and industrial spaces, it combines strength with refined aesthetics. Available in a range of finishes and aggregate exposures, polished concrete is a sustainable, long-lasting flooring solution that enhances light reflection and improves overall space appearance.
